Cesana Brianza, June 2025

Official Letter From Metalfar Prodotti Industriali SPA

Metalfar A182 F51 and A182 F53 material in stock

This official letter from Metalfar Prodotti Industriali SPA has the aim to proudly make you aware about a new channel for business opportunities with us.

In order to challenge the uncertainty of these times, the Management of Metalfar has decided to go out from the worldwide stalemate affecting the commodity business.

The family invested in the purchase of A182 F51 and A182 F53 raw material and starting from the end of June 2025 we will set up a stock of these material grades too. NORSOK APPROVED

This letter has the aim to inform you about it and from now onwards we count on receiving your requirements for these materials.

We thank you for your attention and we remain with best regards.
